Roger that on the 200 lb duck. I've been graced with the instrument in our house from time to time. The daughter plays piano and then obo for concert band and switches between other instruments too.The older boy plays Guitar and for school a sax. The younger boy play bass and for school a trombone. On any given weekend there could be 4-6 kids jamming and recording someting or another. Usually some freakishly old song that we listened too at their age! same as your kids, I dont get it. They all get top grades in school so I give them lots of latitude and support with the music end.
