Parsons. In the SE corner of the state, close to OK and MO border. Really the geographical start of the ozark mountains which are in SW Missouri. We're not flat nor brown. Lots of trees and low rolling hills. 120 miles from KC, Wichita, and Tulsa. Makes the drive to the airport a bitch though. There were three packages of tempest pontiacs. Tempest, Lemans, and GTO. The GTO had a 389, Lemans 326, Tempest a 6 cylinder. I have a rebuilt 326 w edelbrock intake and carb, monster 4spd automatic. Runs good, just enough of a hot rod to make my 17 yr old happy, not enough of one to make Dad nervous. Fun car to drive. Takes 30 minutes to buy gas because everyone wants to talk cars. 24v on tubes? I know just enough to make that sound crazy. One of the things that has got me going on tubes is I bought a Fender blues Jr tube amp for my guitar and fell in love. I know I'll need efficient speakers for the low wattage stuff I'm looking at, and Waynes pi's fill the bill. After hearing how accurate and clean my DR250's (prosound tops) are, I'm convinced that horns are the way to go, after 25 yrs with my beloved EPI's. Plus Wayne's a really good guy, I met him at the prosound shootout in Tulsa this summer, and I intend to go to his GPAF in the spring to hear some of this gear. He also drives a sweet old cutlass. Old cars and audio seem to go together.
