You don`t like "Group Build", don`t like Douglas and don`t like me. Fine, go right back where you came from, on your "better" forums and stop spamming and trolling "Group Build".Your tactic is miserable and seen before, but this time you can`t force anyone to ban Douglas.Your presence is not desirable on "Group Build" any more.And, BTW - download yourself from "Tubes" forum my message "Introduction of PP Theory", you can learn a lot - last time when we saw clearly your behaviour, you claimed that output tube in A-class PP "see" Raa/4 impedance...what an expert...
