Mike accused: ...you have allowed Doug to abuse our trademarks and the goodwill of our trademarks for his personal gain.Sorry dude, no personal gain involved. I have not done anything you have not done for that matter. Mike bought the blueprints, I bought a real example. Both of us sought the winding geometry which constituted the design. Face it, it's a 1948 design(according to Mike).Where do you get off claiming that there is something which can be 'stolen'? It just isn't anything which is even possible to steal. I could be accused of stealing if I had to break in, and steal your copy...but that didn't happen. Not even close.cheers,Douglas
