The Mar/Apr issue of Film Comment has an article. It's a piece about the tv series he did in 1960 calledJohnny Staccato. It took me a while to get to this. I had to get past keepingmy gorge down looking at Dustin Hoffman as the featured artiston the cover. :-/ The writing is good and gives that ol' hipster feelingto the extent that I'm wishing that the shows would bereleased on video. The Cassavettes-directed episodes are being shown at some art houses and, of course, Cassavettesstars as Staccato himself.
