Thanks for the heads up on this one.I enjoyed the Oceans Eleven. The vhs has a special feature onthe costuming detail-- not unusual for women's clothes but thiswas all about those great suits to capture the Vegas that used tobe. I went there once. The movie is better.OTOH, I saw Maynard Ferguson and his 9 piece band live at a smallhigh school near here. This small high school had a greatconcert hall-- totally unexpected for a small farm community.Plus their local Middle school band and HS band were the openers.When MF took the stage the school had actually put together a verygood lighting cue sheet and the MF sound man knew how torun a board. He must not have lost his hearing yet-- as is the impression I get with board operators all the time: couldn'tcarry a tune to the audience on a wheel barrow.All in all a very good experience: something I decided to do atthe last minute.When I think of when I went to school and the _nothing_ they hadfor young musicians and everything for the sports teams I could justpuke.
