Funny; no faith in government, politics, news organisations. Lack of trust in the police and educational system.No trust in the vote or elections or books and newspapers. Little Paranioa here? Sounds like those groups up in Idaho who won't pay taxes and want their own country and build their own militia's. This stuff sounds so strange to us up in here. Hard to get a handle on exactly what goes on down there in the red states.Truthfully; it appears a little frightening. My Daughter had to move to Texas for work. I get worried.
