Thanks Damir. I'm the sound guy. I built and run their pa live. Gets Dad to the shows without being, you know, DAD. Can't take credit for the studio stuff, although I am the critic when it comes to the final mix. The new track terrorist was recorded entirely analog. When I heard it last nite I told them and the studio guy to go back and recut all their tracks. It was awesome on a good system. Warm, and full of definition and image. "Independence Day" is my favorite. Lites up the crowds at shows also.
