Yep; a beautifull day. I got to the beach but didn't have the time to cruise over to Fire Island. Everyone who went said it was magical night. I think the Greek Islands have an average year round temp that stays pretty even no? At least I hope so. I read in the guide that sept is a very good month. I'd ask Damir but he doesn't have the ocean near his area. That part must have dried up.
