Yep; a beautifull day. I got to the beach but didn't have the time to cruise over to Fire Island. Everyone who went said it was magical night.I think the Greek Islands have an average year round temp that stays pretty even no? At least I hope so. I read in the guide that sept is a very good month.I'd ask Damir but he doesn't have the ocean near his area. That part must have dried up.
