I get a sick feeling too. I get the feeling that someday, probably in the not too distant future, we'll all be standing around like German's in 1947.How did this happen?We didn't know!We only knew what our leaders told us!Do you think we are monsters?Do you think we would have let this happen if we knew what was really going on?They deceived us!I was only doing my duty!I wonder who'll play Spencer Tracy's part in the remake.
