Subject: Projects aplenty

I've been upside down with too many projects too. I bought a new home in August, right in the middle of the firestorm in the housing market. What timing, huh? You gotta make it yours, so naturally we had several projects in store for it. We redid the entry way right away and are in the process of building shelves for the living room. They're very large, so it is taking a while. And those kinds of projects with all the unpacking and setup probably will take a year.
