Oh, yeah! Those shelves look great, both in Fred's link and Shane's.

The shelves I'm building are really wide. They'll cover a long wall and serve as bookshelves and also for media storage. On another wall, we're doing smaller shelves with a sort of random cubbyhole look, mostly for trinkets and decorations. Something like this. I've seen this approach used for CD's too but I don't think I'd want to use it for them.
