The dvd version of this film features one of those alternatesoundtracks with commentary by the director. In this case the director is Wim Wenders and one of his deatured performersPeter Falk.I've seen this film a number of times and I think that italong with Wenders other title called Until The End Of The Worldare among the best films ever made. Ever.On this commentary track were many revelations: the trapeze sequences were done by the star Solveg Domartin... without a net and in trainingwhile the film was being shot. Of course one should see the film first as it was meant to be shown.The commentary track was an added pleasure for me who had a lot offamiliarity with it already.The film concerns to 2 angels, Damiel and Casiel played by Bruno Ganz and Otto Sander. In German with subtitles. Not to be missed."I did not know the cure for the disease of images. But I believed in the healing power of words and stories"-- From: Until The End Of The World
