Here's a quick look round the room - Should have tidied up!

Front with small bass traps in top corners and behind mid horn. I was going to get a taller pair as these worked really well.

To the right, with rugs and foam damping panel

To the Rear, with foam cubes in top corners and rear panel.

From your earlier response I should get the bookcase out from behind my seat?

And to the left with large glass sliding door and window

I have some wedge foam tiles which I was going to make two 45 inch, square panels for the ceiling.
