Subject: 2Pi Towers - larger cabinet size-Wayne can you help?

Hi Wayne,

Having used the Pi 1 Towers for some while now, it is time to move on and up to the 2Pi Towers.

I have the drive units for the 2 Pi Towers and since I already have a cabinet that is slightly larger (that I am using with Eminence 12TLA) - I would like to try the 10" Alpha in this , rather than go to the trouble of making additional cabinets - especially since they are very similar in size. The present cabinet volume that I am using is 5.6 cu ft (159 litre) ...13.5" x 15" x 48"

If I am to use this cabinet volume, can you please tell me what the optimum port dimensions should be!?!?!?! Otherwise I am going to have to make another pair of large cabinets!

You help would be MOST appreciated!

Derro
