I read that you liked the Klipsch cornwalls so, I thought I might tear out the bottoms of my lascals and just make a direct radiator out of it. the woofer inside is a k-43 ,Ok I know you dont like talking about other Mfg. But I would like your opinion. These dont sound right compared to the 3-pis. Thanks for your time. Oh I would not sell these Lascals to anybody for home use, because they are a P.A. speaker.
