send them in two separate boxes to avoid size restrictions.

suggest JBL 2226 and DE250 options, and I'd use the larger 15 guage coils.

The size restriction really hurts us here, if we go with parcel post. You can't quite get all the stuff needed in one box, so you have to send the woofer separately. My suggestion would be to source that locally. See if you can find the JBL 2226H. I can send the rest at a reasonable cost.
