You can check the ground using this link...
http://www.the12volt.com/installbay/forum_posts.asp~TID~49445~PN~1

You can set your gain by using these links...
http://mobile.jlaudio.com/support_pages.php?page_id=143
http://www.thesuicidaleggroll.com/gain.htm

You can check the voltage at an amplifier by measuring across the power and ground cable. It should be around 13-14.4 volts at the amp when the car is running.

Good Luck!!!
