Hi everybody,
Last year Wayne sent to me the old Theater 4 plans and now, after some problems, finally I'm ready to start!
Bought the birchwood, I've only to buy the drivers and build the crossover, but just today I've read this topic, and... I'm very interested to the "fight" between the old Theather 4 and the new 4 Pi!
So I would like to know if the new 4 Pi is better than the old Theater 4, and in which areas, sonically speaking.
Many thanks

Best regards
Giampiero - Italy

PS: ... sorry for my bad english...
