Great score Shane,

I think that you have a stereo that was manufactured by Pioneer during that era of Realistic offerings. But, don't quote me on that.

I have a few Harmon Kardon low wattage recievers from the early 1970's that sound great, one that puts out 18 watts and the other 25 watts.

These solid-state recievers will drive any reasonably efficient speaker to their physical limits without breaking a sweat.

Have fun with the score, new toys.

And tell your wife your problem is much better than chasing girls and hanging out in bars, or other alternatives distractions. That is what I tell Diana anyhow.

Norris
