
Subject: Ordering from Parts Express - ART discount?

The thread below, Attracting non-Audiophiles, inspired me to dig out an old PCB board I ordered years ago. The board is the original Zen amp designed by Nelson Pass. I realize this amp is in its 9th stage of development, but I thought it would be a great project for my son.

My son is only 7 but loves putting together electronic kits - mostly LED flashers and such. His eyesight is so much better than mine and he's deadly good with a soldering iron. He soldered all eight pins of 555 IC without any trouble!!! The Zen board is well laid out, with the traces and components not nearly as packed as on some of the projects we've completed. So, it really should be an easy build.

I need a power Tx from Parts Express for this project. So, do ART members get a discount (code????) or does ART receive a donation? Either way is great. I just need to know.....C
