You're right that the spec sheet doesn't show T/S values. I don't recall if I got them from someone at JBL or measured them myself but I do remember it worked well in a pretty small box. Here are the T/S parameters and the spec sheet for the JBL 2115:

Vas 1.2ft3
Fts 55Hz
Qts 0.47
Qes 0.54
Qms 4.0
