You're right that the spec sheet doesn't show T/S values. I don't recall if I got them from someone at JBL or measured them myself but I do remember it worked well in a pretty small box. Here are the T/S parameters and the spec sheet for the JBL 2115:

Vas 1.2ft³

Fts 55Hz

Qts 0.47

Qes 0.54

Qms 4.0
