Hello! There is another problem: what happens if I place to the C1 value a 0,68 microFarad cap, because I can't find good capacitor this 0,47uF value, but I have a 0,68 uF Auricap. Wrong idea?

Or can I use an old(1975) soviet paper in oil 0,47 uF/250V cap?

THX. Istvan
