I'd look for a cartridge on NeedleDoctor.com. There are still plenty of good cartridges available at all price points. I am running a Rega Elys cartridge and I like it a lot. It is a mid-priced moving coil cartridge. Other good popular cartridges include Grado, Shure and Audio-Technica, among many others. I own an Audio-Technica cartridge in addition to the Rega, and I like it as well.

In the post below, you'll find some links that describe turntable setup. Hope it helps!
