Rick,

RE: "Comb filtering doesn't remove everything so you still have to pay attention to the transfer function of your filter."

I'm sorry. Where does comb filtering come in here? Maybe I'm the only one who doesn't understand this, but I would like to know what you are talking about here.

I'm not assuming that its inaccurate, just that I don't know where this came into the discussion.

Thanks,

Marlboro
