Yeah, I think it works for a three way.

While they work fine, if the woofer is bigger, I've always been a fan of three ways just like a point source speaker, and if you need bass below 30 for explosions in HT, then put in a 15 inch sub woofer with a 5 cu ft box.

These would never work for a two way line array, only for a 3-way with a woofer system.
