I completed my speakerbuilding,
I made Pi4 speakers with small differences.

I use a JBL 2345 horn + JBL 2420 driver for the high freq. and Eminence Omega 15pro for the bass/mid freq.

The filter I made is a usual Pi4 filter.

This was my first speaker built with pro-drivers and I think the sound quality is very good.

I'm very happy with them.

Joep
