
Subject: driver mounting -- outside or inside of baffle.

Hello,

I need to know if there is a sonic difference between two mounting configurations of three 8" mids on a baffle.

inside vs. outside: please see the two attached images.

the mids will cover 200Hz to 700Hz, 6db/oct. crossover slopes, mounted on medium size (18" wide x 42" tall) open baffle.

Thanks,
Herman.
