Wayne,

What a great compilation of information about crossover design and DI matching in a two-way speaker using a horn and compression driver for a tweeter.

Obviously, this has taken many hours, even years to gain such knowledge where it could be offered here.

It is an act of selfless devotion to the DIY speaker building community to present this information, a passion.

I thank you for such passion and sharing of your time and knowledge.

This has enriched all of us here who enjoy your offerings.

Norris
