Made some headway on the speakers over the past two days. The New York snow storm gave me the push I needed to get started. Ive got them assembled and running, just need to finish them. My first impression was "WOW, There is actually some bass coming out of these." After the initial shock, I was disappointing with the upper frequency range. I haven't tuned the line yet. I imagine some dampening will clear that up some. Attached are some pictures of the construction process.
