Thank you very much for your reply. I am inclined to accept the asymmetric construction as the real explanation. Could you pls explain why someone would adopt the asymmetric design approach?

The speakers have:

- a) Sub woofer: 17 cm dia, cone type
 - b) Woofer: 20 cm dia, cone type
 - c) Tweeter: 6 cm dia, cone type
 - d) Super tweeter: 2 cm dia, cone type
-
