Tubes I have used:

Penta Labs KT88 SC = very good sounding tubes
EH KT88 = not too bad, very clear sounding, can sound a bit bright
Gold Lion KT88 reissue = great sounding tube, worth the money.
Stock Quicksilver EL34 (Chinese I think) = very good sounding tube
JJ EL34 (80's vintage IIRC) = didn't care for them, sounded a bit congested

On my to-try list:

Gold Lion KT66 reissues
