hey,

up for sale i have my krank revolution 100watt combo.

wrapped in black vinyl with a kick proof chrome speaker cage, looks stunning but SOUNDS even better!

this is possibly the only valve amp that offers so much gain, desired by most current big metal players such as shadows fall and the late dimebag Darrell etc.

selling due to a move to university, id love to keep it but its just too big for travelling.

offers welcome, sensible ones only please

thanks!
