---

I've recently been given (in family) a Montgomery Ward console radio. I need to find/buy some parts to get it back to working order but can't seem to find them online. I'm hoping that someone at the AudioRoundTable can guide me in the right direction.

It is a Montgomery Ward Airline, Model#40a561-1... Flip top, with am/fm, 8track, and turntable (from left to right). I also have the serial#, and some other #s that are on the back label (label is partially torn, so I do not have all the numbers).

The first part I need is a transformer. There is no label on it as far as secondary voltage, but it is labelled 75-270870-3, with the "0-3" part being a little dull and may be misread.

Any help would be appreciated. I'm so glad I found this site!

Thanks!

Jason
