Wayne,
Thanks for your help. That answered a lot of my questions in regards to crossover components. However, I am trying to find a source for the 8-Ohm, 100 Watt non-inductive resistor. I found one that Parts Express offers but I am not sure if it is what I need because they call it a "dummy load resistor". Here is the link:
http://www.parts-express.com/pe/showdetl.cfm?Partnumber=019-020

Is this the correct one to use?
Is there a better brand that I should be considering since I will be upgrading all the other crossover components?
