hi to all!

here's my first post

i'd like to integrate a basshorn in my 4way horn system, using
a pair of jensen a-12 woofers (field coil)

maximum available lenght is 3mt (i need from 40Hz or so to around 250Hz)

are these woofers a good choice ?

how choose the throat ?

throat = S_d will help me to short the horn, any contraindications ?

thanks to all!
