Subject: How Many Speakers For A Home Theater System? Posted by Lancelot on Mon, 03 May 2010 17:06:29 GMT View Forum Message <> Reply to Message

I'm seeing 5 speakers on most home theater setups. Is that enough or adding more speakers will be much better? What is your recommendation on this? I'm also wondering if 2 subs is good to have, one infront and one at the back.
