Equipment I know of included the following which was swapped in/out at various times, as provided by different members of SMAC. There was an iMac with a Cambridge DAC Magic, but I'm not sure any music was ever played through this (I never heard it running).

AMPS:

AES Superamp

Renovated HK Citation II

6b4g SET amp based on PCB from Get*Set*Go (diytube.com)

PREAMP

Rogue Audio Metis Magnum

SOURCES

Marantz SACD/CD

Jolida phonostage (JD9?)

Thorens turntable

No subwoofers were used... just the 3Pi. Heard several positive comments about the room. Unfortunately I only had intermittent and brief listening sessions given all the other rooms and having to keep an eye on a table in the swap room.
