Subject: Re: Surge protectors Posted by Maxie on Wed, 12 May 2010 23:16:22 GMT View Forum Message <> Reply to Message

One thing I did not know when I got my fist computer is that if you are using dial up you need to have your telephone wires going through the surge protector too. I thought I was protected until lightning hit the telephone wires and I didn't know to have them protected. Result - fried modem.
