Subject: Re: zenith transoceanic b600, 6A40 chassis removal Posted by Wayne Parham on Tue, 18 May 2010 04:29:25 GMT View Forum Message <> Reply to Message

Personally, I'd replace all the electrolytic caps with polypropelene caps. I think it's safe to assume they're weak beyond usability. Don't replace resistors unless you know they're bad (which I doubt). Selenium rectifiers are high failure items, although most radios I have with them, they're fine.
