Ah right! The schematic for the power supply is correct, however my receiver unit uses 5 type 227 tubes, has 5 sockets that even say on them 227. And the schematic shows 3 227's and 3 224's.
http://bentongue.com/edison/Service_manual_for_Edison_Radios_R6_R7.pdf

Ill post some pics of this unit tommorow if I have some time.
