Subject: Re: Pi 4.5 possible? Posted by Wayne Parham on Sat, 17 Jul 2010 13:24:04 GMT View Forum Message <> Reply to Message

We've discussed this approach several times, and I think it's a good idea but I think the multisub approach is even better. Of course, you can employ both approaches but if you have to chose one, I'd go multisubs. Take those "helper" woofers out of the main loudspeaker cabinets and place them somewhere else in the room. 2.5 way using two JBL 2226 Upon further investigation...
