Infrasonic wrote on Sun, 18 July 2010 15:26So if I read your reply correctly I can hook both woofers to the lowend output of your crossover but with a inductor in series between the bottom woofer and the output of the crossover?
That's right, exactly.

Perfect! Which size inductor do you recommend, a 5mH or a 2.5mH inductor? Also, would there be a specific one that you would recommend for this situation? Would this type be prefered?
