Infrasonic wrote on Sun, 18 July 2010 15:26 So if I read your reply correctly I can hook both woofers to the lowend output of your crossover but with a inductor in series between the bottom woofer and the output of the crossover?

That's right, exactly.

Perfect! Which size inductor do you recommend, a 5mH or a 2.5mH inductor? Also, would there be a specific one that you would recommend for this situation? Would this type be preferred?

<http://www.parts-express.com/14-gauge-c-core-toroidal-inductors.cfm>

This one maybe?
