Yes, you can still get turntables. Try J&R Music and Computer World or http://www.123dj.com/a_turntables.html. I kept my turntable and albums even though I don't use them now. The sound quality was so much better than CD's (except for the scratches). CD's and MP3's are more convenient though. Someday I'll dig them out of storage and listen again.
