In your opinion and looking at the picture of the chassis I posted at the beginning of this thread would you say that the model 43-7603 is the radio I have?

If so wouldn't it be better to put whatever speaker it came with back in it? If I decide to do that could I use any 10" speaker?

Should I decide to put the 12" field coil speaker I have where do I hook it to?

Bill
