Thanks Advser for such a detailed response. The information is much appreciated. I had tried the different baud rates and I agree that 128kbps and below is very noticeably lacking. I really couldn't tell the difference between 192kbps and 320kbps but it definitely makes sense that 320kbps would be better. I am curious about the Ogg Vorbis and will look into that to see if I can notice better bass and treble. Thanks again.
