I originally thought this would be a good family night movie..I was wrong! My son was scared after the first 20minutes so my wife and I watched the rest of it after he went to bed. I really enjoy the 1st one better. Like others have stated Depp is really creepy in this movie. I like Tim Burton's work, this one just is no comparison to the original. If their was nothing to compare it to than yes it is a good movie.
